

## Distributor Bulletin 2008-04

**Date:** May 22, 2008  
**To:** OPW Fueling Containment Systems Distributors, District Managers, Employees and Customer Service  
**From:** Gene Hunt, Product Specialist  
**RE:** FlexWorks Loop System™ Now Available!!

OPW Fueling Containment Systems is proud to announce the introduction of the industry's first totally integrated "Plug and Play" Underground Fueling System, The FlexWorks Loop System™.

The Loop System™ is the outstanding result of OPW-FCS's all inclusive development program to attain the most environmentally safe underground piping system possible. Every component of the Loop System™ is designed to work together as an integrated system to provide an enhanced level of environmental protection and long term system reliability. The Loop System™ first and foremost enhances the ability of contractors to attain a quality installation, and the ability of owners to inspect, maintain, monitor, and identify and easily repair any potential problem that may develop **BEFORE** there is an environmental or safety issue.

In addition to providing the most environmentally secure underground fueling system, the Loop System™ provides the lowest cost of ownership of any fueling system by drastically reducing field installation time and the associated opportunities for mistakes. Ongoing inspection, monitoring and maintenance costs during the life of the station are likewise minimized. Some of the many features of the Loop System™ include:

- Factory installed pipe entry boots, stabilizer bars, and shear valves
- No height adjustment required on dispenser sumps
- No need to use and connect T and L pipe fittings (eliminates joints)
- No need to measure, cut, thread, and install steel or flexible riser pipes (more cost and joints eliminated)
- No need for rubber test boots
- No need to trim back the secondary pipe jacket before coupling pipe
- Easy access provided just below grade to all under dispenser components and connections for inspection, repair, or testing
- No need to ever remove the dispenser to inspect, repair, or replace pipe sections.

The Loop System™ represents the state of the art in a completely integrated, environmentally secure underground fuel delivery system. It employs factory assembled components and reduces field labor costs as well as opportunities for installation errors. The OPW-FCS Loop System™: Providing new solutions to minimize fuel delivery system problems, provide a higher level of environmental protection, and lower the cost of fuel delivery system ownership.

Enclosed you will find all the information required to understand the operation of the Loop System™ as well as order Loop System components. Contact your OPW District Manager for technical assistance, site take-off assistance, and regulatory status in your region. In addition, OPW-FCS Customer Service stands ready to address your questions by calling 1-866-547-1816.

As always, OPW Fueling Containment Systems appreciates your business and continued support.
